

Dear Families,

We're excited to share that Brooker Memorial Pediatric Dental Center and the Foundation for Community Health are partnering to bring free preventive dental care directly to the Region One elementary schools and the Botelle School in Norfolk for the 2025–2026 school year!

This program is available to all students in Pre-K through Grade 8. You are encouraged to take advantage of this opportunity to support your child's health and well-being.

A licensed CT registered dental hygienist from Brooker Memorial in the licensed mobile dental clinic at your child's school will provide:

- Dental cleanings
- Fluoride treatments
- Oral health screenings
- Sealants (if needed)

If your child requires sealants or additional dental care, you'll receive a follow-up report by mail with recommendations. Even if your child already sees a family dentist or visits Brooker Memorial regularly, they are still welcome to participate. Our goal is to make dental care accessible and convenient for all families, especially knowing how hard it can be to take time off work for appointments.

All children will be shown an educational video presentation on nutrition prepared by the dental hygienist. Each child will receive a "goody bag" which includes a new toothbrush, toothpaste and a sample dental floss.

To enroll your child, simply complete the enclosed consent and information forms and return them to your school nurse. You can also fill out the forms online using the QR code on the flyer.

We kindly ask that you provide your dental insurance information and allow us to bill your insurance to help cover program costs. Families without insurance will not be billed for any services provided at school.

We look forward to caring for your child and helping them maintain a healthy, happy smile!

Regards,

Christina Emery
Executive Director
